

Numerical Control Part Programming

by James J Childs

In the machine tool category, CNC is widely used for lathe, drill press, milling machine, . The part program is a detailed set of commands to be followed by the machine tool. assisted language such as APT (Automated Programming Tool). Part program creation is examined. • Machine programming concepts are outlined. A numerical control, or "NC", system controls many machine functions and Computer Numerical Control Programming - Norco College Level 2 - EDEXEL BTEC Level 2 Part Programming Computer .
